

DCNSEV30 SERIES HIGH CURRENT HIGH VOLTAGE DC CONTACTOR RELAY

Description

High current and high voltage DC contactor relays for electric vehicle applications such as battery power supply, charging pill, motor control, circuit insulation, circuit protection, and also safety devices for industrial machinery. Are available with polarized and non-polarized contacts to best suit electrical systems' polarity.

Specifications Overview

30A Continuous Carry Amperage: Housing: Nylon UL 94-V0 12-900V **Voltage Rating:**

Output Connectors: M5 Bolt and Lockwasher Connections

(not supplied)

Connectors: Wire Leads for Control Circuit

IP67 **Ingress Protections:**

Operating Temperature: -40 to 85°C SPST NO Circuitry:

Coil Voltage: B: 12V DC Nominal, 8 - 16V DC Working

C: 24V DC Nominal, 18 - 28V DC Working

Max Coil Inrush Current: B: 500mA Max to coil

C: 250mA Max to coil

Mounting: M4 with Compression Limiters

(not supplied)

Size: 54mm x 40mm x 45mm

Mounting Bolt Torque: 2.3 Nm (20 in-lb)

Contact Torque: 3.4 - 4.5 Nm (30 - 40 in-lb) **Terminals:** M5 Silver Plated Copper

Approvals: UL File No. E510407 Recognized

Ordering Information

Applications

- Battery Electric Vehicles
- Hybrid Electric Vehicles
- Material Handling

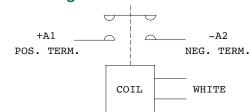

C ∈ (Ψ)

- Electric Maintenance and Transport Vehicles
- Industrial Applications

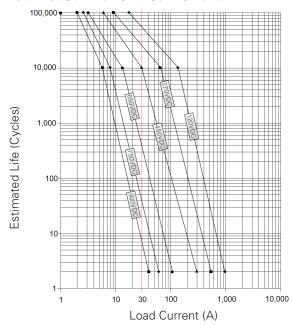

Features and Benefits

- High current (30A) and high voltage (900V) contactor for EV applications
- Compact structure, helping reduce noise when turned on
- Sealed IP67, gas-filled relay which mitigates arcing
- No mounting orientation restrictions
- Designed and manufactured under the IATF16949 certification for Automotive Quality Systems.
- Designed specifically for automotive applications.

Application Note:

- Be sure to use washer to prevent screws from loosening, all the terminals or copper bar must be in direct contact with the contactor's terminals. Screw tightening torque is specified below. Exceeding the maximum torque can lead to product failure.
 - Contact torque: 30 40 lb.in (3.4 4.5 N.m) Max. Active length of thread is 7.0 mm
 - Mounting torque: 20 lb.in (2.3 N.m)
- 2. Contact terminals are polarized so refer to drawing during connecting. We suggest using a varistor rather than diode as a surge protector.
- Do not use if dropped.
- Avoid installing in a strong magnetic field (close to a transformer or magnet), or near a heat source.
- 5. Electrical life

Use per load capability and life cycle limits so as not to cause a function failure (treat the contactor as a product with specified life and replace it when necessary). It is possible to make parts burn around the contactor once operating failure occurs. It is necessary to take layout into account and to make sure power shall be cut off within 1 second.

- 6. Lifetime of internal gas diffusion
 - The contactor is sealed and filled with gas, lifetime of gas diffusion is determined by temperature in contact chamber (ambient temperature + temperature generated by contact operation). Operate only in an ambient temperature from -40 to +85 $^{\circ}\text{C}$.
- Drive power must be greater than coil power or it will reduce performance capability.
- 8. Avoid debris or oil contamination on the main terminals to optimize contact and avoid excess heat generation.
- After continuous rated voltage / current has been applied to the coil and contacts, turning off the coil and immediately re-energizing the coil will result in a higher pick-up voltage than the rated value. This is due to increased coil resistance (coil temperature rise) of the device.
